

The General Principles of Sustainability Relative to Building

Active Learning Exercises:

1. Choose a topic from the following list:
 - a. Solar panels
 - b. Biomass energy
 - c. Organic farming
 - d. Green building
 - e. Water conservation
 - f. Public transportation
 - g. Green roof system
 - h. Energy efficient appliances
2. Create a Venn diagram with 3 circles (environmental, economic, and social)
 - a. Define three examples for each pillar (circle) which describe how your topic either contributes or stands in the way of that particular pillar
